Gequence 17, Application US/09709188

Patent No. 6441137

GENERAL INFORMATION:

APPLICANT: Davis et al.

ITILE OF INVENTION: Expressed Ligand - Vascular Intercellular Signaling Molecule

FILE REFERENCE: REG 333.2

CURRENT APPLICATION NUMBER: US/09/709,188

CURRENT FILING DATE: 2000-11-09

FRIOR APPLICATION NUMBER: 08/740,223

FRIOR FILING DATE: 1996-10-25

NUMBER OF SEQ ID NOS: 30

SOFTWARE Patentin Version 3:1

Sequence 17, Application US/08740223A
Patent No. 626564
GENERAL INFORMATION
APPLICANT: Davis, et al.
TITLE OF INVENTION: Expressed Ligand - Vascular
TITLE OF INVENTION: Intercellular Signalling Molecule
NUMBER OF SEQUENCES: 28
CORRESPONDENCE ADDRESS:
ADDRESSE: Regeneron Pharmaceuticals, Inc.
STREET: 777 Old Saw Mill Road
CITY: Tarrytown

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            ò
